## Would Burn Russian City To Stop Spread Of Cholera

From its Helsingfors correspondent to the effect that the Soviet commissary in Astrakhan, an island in the Voiga, has informed the Soviet government the town is so full of filth and in such a terrible condition that it would be useless to try to fight the cholers plague there by disinfection, and that he recommends the drastic measure of burning the town.

The Soviet commissary, the report says, proposes that the inhabitants of Astrakhan should be sent to Sileeria.

Latest available figures give the population of Astrakhan as about 113,000.

It has been the experience of many that the cup of tea or coffee, taken at meal-time, robs them of sleep.
